

## **Consensus invests in Carasent ASA**

Wednesday, 13/5/2020

**The two Consensus funds “Småbolagsfonden” and “Sverigefonden” have, in total, acquired 1.2 million shares in Carasent ASA. This corresponds to 3% of the votes and capital, which places the funds in the top ten of the company’s list of largest shareholders.**

Consensus fund activities highly focuses on investments in undiscovered small companies on stock exchange lists that are not normally followed by the traditional banks and analysts. The management aims to find companies with the relatively unusual combination of low valuation and strong growth figures.

- We have had a close eye on Carasent ASA and its subsidiary Evimeria EMR AB for a period of time and they meet our criterias with profitable, high growth and an attractive business model in a cyclically insensitive market. All this during a structural change where digitalisation is a strong drive, says Anders Wright, fund manager at Consensus.

Evimeria EMR AB develops and delivers digital e-health services to over 400 clinic customers in the private health care market in Sweden and has in recent years had an average growth of 40% per year. Products and services are delivered as a SaaS service with a high proportion of repeatable revenue. The strategy ahead is based on three key foundations: geographical expansion, new market segments and an expanded product and service offering.

- The fact that one of the most successful small company funds chooses to invest in the company is a good grade and approval of our work, comments Johan Lindqvist, Chairman of the Board of Carasent ASA.

### **About Carasent ASA**

Founded in 1997, Carasent (former Apptix ASA) was previously the parent company of Apptix Inc but withdrew from the US market in 2017. In May 2018 Apptix, now Carasent, acquired the Swedish company Evimeria EMR AB, a company providing cloud-based medical record services to the health care industry. The company’s strategy is to continue to develop and expand digitalization that helps customers to meet challenges in providing efficient and qualitative health care services.
